# Expeditie Spinvis

## Beauty in Science

Why do we search for symmetry, simplicity and unity in nature and in our representations of the world? Is there Truth in Beauty?

This autumn, musician and artist Spinvis is the first Artist in Residence @TU/e. Together with a heterogeneous group of 25 students – bachelors and masters, PDEng's and PhD's – Spinvis will explore 'beauty' in a scientific context. This project is called EXPEDITIE SPINVIS. It includes six (private) masterclasses, three public events and an excursion to CERN, Geneva (just for students and the Artist in Residence).

EXPEDITIE SPINVIS needs thinkers, sweepers, drivers, hands-on-deck, chefs, debaters, dream chasers, gardeners (why not?), teamplayers and the devil's advocate. Tell us in a 1 minute video why we need you and show us which 'thing of beauty' you would bring with you and should be added to the CERN experiment. Explain why this object sparks such beauty for you.
